

Symantec™ Security Seminars

Overview

Symantec Custom Learning Services offers world-class security awareness and security principles courses around the world. In addition to Instructor-led and Web-based security course offerings, there are situations where specialized learning content delivered in a compressed timeframe is needed. Recognizing that, Symantec Custom Learning Services offers a variety of one-hour to four-hour Security Seminars that can be fully tailored to the specific needs of an organization.

Custom seminars can be developed for audiences of any level, role and responsibility. The Security Seminars are an efficient way to impart security topics to specialized audiences when implementing a full class schedule is not practical. For example, a one-hour Seminar can educate executives on trends and best practices in security awareness, or current legal/regulatory/compliance issues. Or, a longer technical Seminar can instruct developers, infrastructure or IT personnel on relevant security concepts such as network, host or application security.

Pertinent Content, Conveniently Delivered

Security Seminars developed by Symantec Custom Learning Services are:

- Short in duration and easily deployed
- Based on focused topics
- Frequently utilized as reinforcement for learning and awareness
- Useful for timely, ongoing security updates
- A cost-effective delivery mechanism for a variety of audiences
- Taught by experienced instructors who can bring the content “to life”

Selected Seminar Topic Examples

Technical

- Security Awareness for Your Technical Staff
- Application Security Principles Concepts
- Infrastructure Security Principles Concepts
- Best Practices for Incorporating Security in the Software Development Lifecycle

Executive

- Security Awareness for Your Leadership Team
- Regulatory Security Issues and the Changing Nature of Information Security
- Effective Leadership for a Secure Organization
- Making Security an Enabler and Differentiator in the Market (While Driving Business)

Symantec™ Security Seminars

Employee

- Security Awareness for Your Employees (Including Temps, Contractors and Vendors)
- Employee Security Responsibility/Security Risks and Best Practices
- Email Security: Phishing, Spamming and How to Handle Them (at Work and at Home)

Security Seminars are taught by instructors with in-depth security expertise drawn from years of experience in the security industry. This expertise enables them to develop and conduct specialized learning sessions that are relevant, interesting and immediately applicable.
