

Symantec™ Mail Security for Domino® 2007

An integrated security solution that protects against viruses, spam, and security risks and enforces company policies

Overview

Symantec Mail Security for Domino 2007 provides high-performance, integrated mail protection against virus threats, spam, security risks, and other unwanted content on Domino servers. Enhanced, proactive policy enforcement tools help organizations ease the process of complying with government-mandated or internal policy.

Key benefits

- Enhanced reporting provides mission-critical summaries as well as detail to provide customized views that fulfill the needs of various report viewers.
- Optimized scanning capabilities minimize server resource consumption by eliminating unnecessary multiple virus scans across the enterprise.
- Automatic classification for policy enforcement eases the burden of policy compliance when used with Symantec Enterprise Vault™ 2007.
- Optional Symantec Premium AntiSpam™ subscription service provides best-of-breed spam prevention with low administrative overhead and no additional software to install.
- Backed by Symantec Security Response, the world's leading antivirus and Internet security research and support organization.

New features in this release

- Secure scanning optimization allows administrators to avoid repetitive scanning of documents that have been scanned previously using current virus definitions.
- Rapid Release definition support enables administrators to deploy Rapid Release definitions to the Domino environment with no additional scripting. One click returns an environment to standard LiveUpdate™ distribution methods if desired.
- Symantec Enterprise Vault tags can now be applied to specify email archiving policy. Policies can be defined for any content type, set retention policy, and search criteria for Symantec Enterprise Vault, Enterprise Vault Discovery Accelerator, and Enterprise Vault Compliance Accelerator.
- Graphical reporting enables administrators to efficiently identify threats and monitor the overall status of Symantec Mail Security operations.
- Attachment content scanning now provides the ability to identify and/or filter inappropriate content within attachments.

System requirements

- Lotus Domino® server version 6.5.x or 7.x
- Microsoft® Windows® 2000 Server, Windows 2000 Advanced Server, Windows Server 2003, or Windows Server 2003 Enterprise Edition
- Lotus Notes® client
 - Lotus Notes version 6.5.x or 7.x
 - 128 MB RAM minimum (256 MB or more recommended)
 - 300 MB available disk space

Note: Domino server should be sized based on Domino system requirements. System requirements should take into account additional needs such as file system antivirus protection, backup operations, and other business-critical applications unique to the environment.
