Symantec AntiVirus™ Corporate Edition

Automated defense and response against the latest viruses, spyware, and adware

Overview
Symantec AntiVirus Corporate Edition provides real-time virus and spyware protection for workstations and network servers to enable enterprise-wide system uptime. The solution automatically detects and repairs the effects of spyware, adware, viruses, and other malicious intrusions, and side-effect repair keeps systems operational during security disruptions. A comprehensive view of clients via centralized logging, threshold alerting, and graphical reporting helps transform security data into actionable information. Symantec AntiVirus Corporate Edition now offers support for Microsoft® Windows Server® 2008 clients as well as Linux® clients, and is highly scalable for extensive use throughout even the largest enterprise.

Key benefits
• Advanced, enterprise-wide virus protection and monitoring from a single management console
• Symantec tamper protection guard against unauthorized access and attacks, protecting users from viruses that attempt to disable security measures
• Integrated Web-based graphical reporting
  – Scalability to support thousands of users
  – Simple installation
  – Streamlined workflow and usability
  – Available reports meet primary administrative needs
• Linux client support

• Improved protection from spyware and adware, including:
  – Spyware repair enhancements that automatically block spyware installation
  – Stealthed spyware detection and remediation
  – Improved spyware repairs for invasive risks
• Backed by Symantec Security Response, the world’s leading Internet security research and support organization

New features in this release
• NEW! Client support for Microsoft Windows Server 2008 and Windows Vista™ Service Pack 1
• NEW! Support for Microsoft Windows XP Service Pack 3

System requirements
Symantec AntiVirus Corporate Edition 10.2
Symantec System Center
• 64 MB RAM
• 36 MB disk space without Snap-ins
• 337 MB disk space for Reporting Snap-ins
• 518 MB disk space for Symantec Endpoint Compliance Snap-in
• 24 MB disk space for AMS³ Snap-in
• 6 MB disk space for Symantec AntiVirus Snap-in
• 1 MB disk space for Symantec Client Firewall Snap-in
• 130 MB disk space for AV Server Rollout tool
• 2 MB disk space for ClientRemote Install Snap-in
• Microsoft Internet Explorer 5.5 SP2 or later
### Data Sheet: Virus Protection and Endpoint Security
Symantec AntiVirus Corporate Edition 10.2

- **Microsoft Management Console (MMC) 1.2 or later.**
  If MMC is not already installed, you will need 3 MB free disk space (10 MB during installation). If version 1.2 or later is not on the computer to which you want to install, the installation program installs it.

**Symantec AntiVirus Server for Windows**
- 64 MB RAM
- 140 MB disk space
- 15 MB disk space for reporting agent files (if you choose to install the reporting agent)
- Microsoft Internet Explorer 5.5 SP2 or later
- Static IP address (recommended)

Note: Symantec AntiVirus does not support the scanning of Macintosh® volumes on Windows servers for Macintosh viruses.

**Symantec AntiVirus Server for NetWare®**
- NetWare 5.1 SP8 or higher, NetWare 6.0 SP5 or higher, NetWare 6.5 SP2 or higher
- 15 MB RAM
- 116 MB disk space (70 MB disk space for server files and 46 MB disk space for the client disk image)
- 20 MB disk space for AMS² server files (if you choose to install the AMS² server)
- Static IP address (recommended)

**AMS² Server (optional, for legacy support)**
- 10 MB RAM
- 15 MB disk space for AMS² server files for Windows
- 20 MB disk space for AMS² server files for NetWare

**Reporting Server**
- Windows 2000 Server/Advanced Server; Windows Server 2003 Standard/Enterprise SP1 or higher
- 256 MB RAM for 100 clients
- 512 MB RAM for 1,000 clients
- 1 GB RAM for 50,000 clients
- 1.5 GB disk space for 100 clients, 2 GB disk space for 1,000 clients, or 40 GB disk space for 50,000 clients
- MSDE 2000 SP4 (installable), Microsoft SQL Server 2000 SP1 or later (existing), or Microsoft SQL Server 2005 or later (existing)
- Internet Information Services 4.0 or later
- Microsoft Internet Explorer 5.5 SP2 or later

Note: You must enable active scripting on your Web browser before you use the reporting server from the Symantec System Center or your Web browser.

**Reporting Agent**
- 11 MB RAM
- 15 MB disk space

**Quarantine Console**
- 64 MB RAM
- 35 MB disk space
- Microsoft Internet Explorer 5.5 SP2 or later
- Microsoft Management Console (MMC) 1.2 or later.
  If MMC is not already installed, you will need 3 MB of free disk space (10 MB during installation).
Central Quarantine Server

- 128 MB of RAM
- 40 MB of disk space for Quarantine Server
- 500 MB to 4 GB disk space recommended for quarantined items
- Microsoft Internet Explorer 5.5 SP2 or later
- Minimum swap file size of 250 MB

Note: If you run Windows XP, system disk space usage is increased if the System Restore functionality is enabled. For more information on how System Restore works, see the Microsoft operating system documentation.

Symantec AntiVirus for 32-Bit Windows Clients

- 64 MB RAM (512 MB on Windows Vista and Windows Server 2008; 1 GB recommended for Windows Server 2008)
- 55 MB disk space (400 MB on Windows Vista and Windows Server 2008)

Note: The Server Core installation option for Windows Server 2008 is not supported.

- 70 MB disk space (400 MB on Windows Vista and Windows Server 2008)
- Microsoft Internet Explorer 5.5 SP2 or later
- Intel® processors that support Intel Extended Memory 64 Technology (Intel EM64T)
- AMD 64-bit Opteron and Athlon processors

Note: The ClientRemote Install tool does not check to verify that Internet Explorer 5.5 SP2 or later is installed on computers when it is required. If the target computers do not have the correct version of Microsoft Internet Explorer, the installation fails without informing you.

Terminal Server clients connecting to a computer with antivirus protection have the following additional requirements:

- Microsoft Terminal Server RDP (Remote Desktop Protocol) client
- Citrix Metaframe (ICA) client 1.8 or later if using Citrix Metaframe server on Terminal Server

Symantec AntiVirus for 64-Bit Windows Clients

- 70 MB disk space (400 MB on Windows Vista and Windows Server 2008)
- Microsoft Internet Explorer 5.5 SP2 or later
- Intel® processors that support Intel Extended Memory 64 Technology (Intel EM64T)
- AMD 64-bit Opteron and Athlon processors

Note: The ClientRemote Install tool does not check to verify that Internet Explorer 5.5 SP2 or later is installed on computers when it is required. If the target computers do not have the correct version of Microsoft Internet Explorer, the installation fails without informing you.
Linux client

Symantec AntiVirus supports installation on the following Linux distributions:

- Red Hat Enterprise Linux 3.x, 4.x, 5.x
- SUSE Linux Enterprise (server/desktop) 9.x, 10.x
- Novell Open Enterprise Server
- VMware ESX 2.5.x, 3.x

Note: Symantec AntiVirus Linux clients are unmanaged clients. You cannot use the Symantec management components, such as Symantec System Center, to centrally manage Symantec AntiVirus Linux clients.
