

HP™ Deployment and Migration Essentials from Symantec™

On-demand delivery and centralized license management to optimize the accessibility, manageability, reliability, and productivity of applications on HP client computers

Overview

HP™ Deployment and Migration Essentials from Symantec™ reduce the time and cost needed to deploy and manage servers, desktops, notebooks and thin clients. The software provides streamlined centralized deployment, migration, and configuration of operating systems, personal settings, and software across multiple hardware and OS types.

Developed in a longstanding collaboration between Symantec and HP, HP Deployment and Migration Essentials from Symantec are fully compatible with both the free HP Client Manager download and the powerful Altiris Client Management Suite from Symantec.

Symantec HP Client Manager Essentials offer management solutions compatible with both HP Client Manager and Altiris Client Management Suite

Key benefits

- Reference server and desktop image creation and deployment with names, security IDs, IP addresses, and network settings for speed and flexibility in even large deployments
- Single deployment solution for multiple hardware platforms, operating systems, and pre-boot environments, for simplified administration with fewer tools to learn and use. Coverage includes:
 - Virtual machine support assures smooth operation across virtual and physical domains
 - Drag-and-drop or optional Web-based console simplifies deployment, image and event replication, and management of computers, jobs, and tasks
 - Advanced automation and custom scripting options offer unparalleled job and task management to meet specialized requirements
- Department- or user-level configuration of drivers and software updates to keep systems secure, up to date, and policy-compliant—freeing IT staff for higher-value assignments
- Hands-free migration preserves desktop files, settings, preferences, and user data in a single self-extracting file, simplifying OS and hardware upgrades and saving end users time, effort, and frustration
- Role-and-scope security features protect management functions from unauthorized access on both consoles and managed systems
- Client tools for visibility, remote control, and

communication simplify client diagnosis and repair

Notification Server (Console)

- Processor—Pentium III 800 MHz or faster
- Memory—1 GB RAM
- Hard drive—20 GB
- Operating system—Microsoft Windows Server 2003 SP1, Windows 2000 Server SP4 or later
- Database—Microsoft SQL Server 2000 SP3 or SQL Server 2005
- Browser—Microsoft Internet Explorer 6 SP1 or later

Client Agent

- Operating system—Microsoft Windows 2000 or later
- Available disk space—5 MB
- Memory—128 MB RAM (384 with Microsoft Windows PE)
- Browser—Microsoft Internet Explorer 6 or later
