

# HP™ Workspace Virtualization Essentials from Symantec™

Low-overhead virtualization insulates applications from the OS and one another, for conflict-free execution and simplified administration of applications on HP client computers

## Overview

HP™ Workspace Virtualization Essentials from Symantec™ provide powerful, low-overhead application virtualization on HP client computers. The software combines endpoint virtualization to improve application reliability and eliminate conflicts with optional on-demand application streaming for flexibility and economy.

Developed by Symantec and qualified by HP, HP Workspace Virtualization Essentials offer a revolutionary approach to software management. Operating in virtual or hybrid environments, the solution helps deliver maximum return from applications, while protecting HP client computers and the network environments in which they run.

Symantec HP Client Manager Essentials offer management solutions compatible with both HP Client Manager and Altiris Client Management Suite

## Key benefits

- Applications run without modifying the OS, registry, or .DLLs, minimizing interference and inadvertent “unpatching” of security holes
- Support for multiple application versions offers fast, safe rollouts, and instant rollbacks as needed
- Optional application streaming improves management flexibility, economy and effectiveness:
  - users may access applications from any computer or mobile device on which the client platform is installed
  - instantaneous updates, upgrades and rollbacks

## Data Sheet: Client Management HP™ Workspace Virtualization Essentials from Symantec™

- simplify applications management
- dynamic license management with automatic reprovisioning saves 30% to 40% of software license costs
- “compute anywhere” flexibility simplifies planning for business continuity and disaster recovery
- on-demand streaming and incremental upgrades conserve network bandwidth
- Compatible with existing tools and processes through the powerful Client Management Suite or other desktop management software
- Low-overhead virtualization conserves client resources for productive work
- Applications insulated from the OS and other applications, for systems that remain stable even when applications fail
