# Symantec™ Data Loss Prevention Network Discover

Discover, monitor and protect the data that drives your business

Do you know...

- Which file servers contain exposed confidential data?
- Which databases contain confidential data?
- Who has unauthorized access to your data?

Overview

Symantec™ Data Loss Prevention Network Discover quickly discovers exposed confidential data wherever it is stored with the broadest coverage of enterprise data repositories including file servers, databases, document and records management, email repositories, and web content and applications.

Benefits

- Gain visibility into where confidential data is stored
- Automatically identify owners of sensitive data
- Get results quickly with minimal network impact
- Reduce proliferation of confidential data

Features

- Broadest data repository coverage
- Complete data context
- Scalable scanning and systematic re-scanning options
- Flexible scan deployment options

Use cases

- Create an inventory of all your sensitive data
- Identify high risk systems and prioritize data clean up
- Demonstrate regulatory compliance

Additional Symantec™ Data Loss Prevention products

Data Loss Prevention delivers a unified solution to discover, monitor, and protect confidential data wherever it is stored or used.

- **Symantec™ Data Loss Prevention Endpoint Discover** scans for confidential data stored on the endpoint including laptops and desktops in order to inventory, secure, or relocate the data.
- **Symantec™ Data Loss Prevention Endpoint Prevent** monitors and blocks confidential data from being transferred, sent, copied, or printed by desktop or laptop PC users.
- **Symantec™ Data Loss Prevention Enforce Platform** manages universal Data Loss Prevention policies with a centralized platform for detection, incident remediation workflow and automation, reporting, system management and security.
- **Symantec™ Data Loss Prevention Network Monitor** inspects all network communications for confidential data sent in violation of data security policy.

Confidence in a connected world. ✸ symantec™

- **Symantec™ Data Loss Prevention Network Prevent** proactively stops network communications from being sent in violation of data security policy.
- **Symantec™ Data Loss Prevention Network Protect** automatically protects stored network data with automated quarantine, copy, removal or application of Enterprise Rights Management (ERM) or encryption.

System requirements and supported platforms

- Microsoft® Windows® Server 2003 Enterprise Edition, SP2 (Server and Agent)
- Red Hat® Enterprise Linux 4.0 & 5.0 (Server)
- VMware® ESX V3.x
