

# Symantec™ Mail Security for Domino® Multi-Platform

Real-time Protection Backed By The Largest Investment In Security Infrastructure

---

## Overview

Symantec™ Mail Security for Domino® Multi-Platform Edition provides real-time protection against viruses, spam, spyware, phishing, and other attacks while enforcing content policies for your Lotus Domino email, documents, and databases.

The solution is designed as an integrated Lotus Domino application and optimized for high performance, including native 64 bit support on both Windows and AIX environments. Cross platform policy management simplifies administration in heterogeneous environments. Powered by Brightmail technology, the Premium Antispam add-on subscription stops 99 percent of spam while making fewer than 1 mistake per million messages. With the largest investment in security infrastructure, Symantec provides leading protection.

Symantec Mail Security compliments other layers of protection by preventing the spread of email borne threats internally and by serving as a first line of defense from threats in mail stores and in case of perimeter failure.

---

## Key Benefits

### *Comprehensive Protection*

- Provides real-time protection against viruses, mass-mailer worms, Trojan horses, spam, spyware, phishing, and denial of service attacks while enforcing content policies
- Powered by Brightmail technology, the optionally licensed Premium Antispam Add-on stops 99 percent of spam while making fewer than 1 mistake per million messages (available on Windows 32-bit only)
- Rapid release definitions and pro-active signature-independent technologies provide immediate protection
- Content Filtering prevents data loss and compliance violations using pre-defined policies and dictionaries,

regular expressions, attachment criteria, True File typing, and more

### *Flexible and Easy to Use Management*

- Cross platform policy and definitions management simplifies administration in heterogeneous environments
- Centralized quarantine database significantly reduces effort required to track down quarantined emails and attachments across all servers
- Role-based quarantine access control enables administrators to delegate management of content policy violations
- Symantec Enterprise Vault™ tagging enables automatic content and retention policy definition
- Outbreak Notification alerts administrators to the first sign of a virus outbreak, enabling an immediate response

### *Optimized for the Lotus Domino*

- Designed as an integrated Lotus Domino application
  - Full support for Lotus Domino Clusters
  - Native 64 bit support on both Windows and AIX environments optimizes for performance and scalability
  - Protection for Linux, Solaris, and iSeries environments are also included in the Multi-Platform Edition via Symantec Mail Security for Domino 3.2
- 

### *New Features in the 8.0.5 Release*

- Native 64 bit support on both Windows and AIX environments optimizes for performance and scalability
- Refined product architecture further improves performance and disk I/O
- Unified virus definitions management and replication across clusters

## Data Sheet: Messaging Security Symantec™ Mail Security for Domino® Multi-Platform

- Content violation detection inside container files and attachments
- Enhanced logging and error handling
- Content filtering support in Scheduled and On-demand scans
- Custom email disclaimers and signatures

---

### System Requirements

#### Mail Security for Domino 8.0.5

##### Supported Operating Systems

- Microsoft Windows Server 2008 R2/SP2 Standard/Enterprise (32-bit or 64-bit)
- Microsoft Windows Server 2003 R2/SP2 Standard/Enterprise (32-bit or 64-bit)
- IBM AIX version 5.3 or 6.1

##### Supported IBM Lotus Notes Platforms

- IBM Lotus Domino Server 7.x, 8.0.x, or 8.5.x (32-bit or 64-bit)
- IBM Lotus Notes Client 7.x or later

#### Mail Security for Domino 3.2

##### Supported Operating Systems

- Novell SUSE Linux Enterprise Server 9.0 or later (32-bit or 64-bit)
- RedHat Enterprise Linux 4.0 or later (32-bit or 64-bit)
- Sun Solaris 8 or later
- IBM iSeries V5R3 or later

##### Supported IBM Lotus Notes Platforms

- IBM Lotus Domino Server 7.x, 8.0.x, or 8.5.x (32-bit or 64-bit)
  - IBM Lotus Notes Client 7.x or later
-
