

Symantec™ Mail Security for Microsoft® Exchange

An integrated, high-performance security solution that protects against viruses, spam, and security risks while enforcing company policies

Overview

Symantec Mail Security for Microsoft Exchange provides high-performance, integrated mail protection against virus threats, spam, and security risks, while also enforcing company policies on Microsoft Exchange Server 2000, 2003, and 2007. A Symantec Premium AntiSpam™ subscription can be activated by purchasing a license key to provide best-of-breed spam prevention with a spam effectiveness rate of more than 99 percent, and with 1 in 1 million false positives—without additional ongoing administration after initial setup.

New Features

Extended support for Microsoft Exchange 2007 Server

- Content Filtering
- Manual and Scheduled Scan

Performance Enhancements

- Optimized codebase
- In-memory scanning
- Edge and Hub focused scanning, reducing need to scan on mail server
- Intelligent scanning between server roles

Added compatibility and supportability

- Compatibility with Symantec Endpoint Protection for 64-bit environments
- Server names inclusion in notifications

Key Benefits

Industry-leading antivirus defends against new and known viruses and security risks

- Rapid Release definitions are updated approximately every 30 minutes to ensure protection against emerging threats
- Backed by Symantec Security Response, the world's leading antivirus and Internet security research organization

Industry-leading antispam with a spam effectiveness rate of more than 99 percent, with 1 in 1 million critical false positives

- Over 20 filtering technologies including spam signatures, heuristics, reputation filters, language identification and proprietary methods
- 24x7 real-time protection provided by Symantec's patented Probe Network of over 2.5 million decoy accounts, across 70 countries

Integrated content filtering for policy enforcement, blocking inappropriate content and restricting confidential information from being sent

- Flexible user- and group-based policy enforcement rules allow creation of targeted rules to prevent inappropriate communications
- Advanced policy rules filter inappropriate content within most attachment file formats, and block files based on true file type (not just file extension)

Centralized management and consolidated reports

- Intuitive user interface provides a consistent and high performance administration experience

- Enables administrators to update settings of individual servers and groups of servers remotely
- Aggregates data from all Exchange servers within a group for a single report on all activity within the Exchange environment

Server Installation System Requirements

Operating Systems

- Windows® 2000 Server/Advanced Server/Data Center (SP4)
- Windows Server 2003 Standard/Enterprise/Data Center (SP1)
- Microsoft Windows Server 2003 x64 or Windows Server 2003 R2 x64, Standard or Enterprise Edition
- Microsoft Windows Server 2008 x64 Standard or Enterprise Edition

Minimum System Requirements

For Microsoft Windows Server 2003 x64 or 2008 x64 Standard or Enterprise Edition

- Intel® Server-class 32-bit processor
- 1 GB of RAM

For Exchange Server 2007

Only for Microsoft Exchange Mailbox server role, Microsoft Exchange Server MAPI client and Collaboration Data Objects 1.2.1

- x64 architecture-based computer with Intel processor that supports Intel Extended Memory 64 Technology (Intel EM64T), or AMD processor that supports the AMD64 platform
- 2 GB of RAM minimum

For all versions of Exchange

- 325 MB available disk space for Symantec Mail Security

for Microsoft Exchange

- .NET Framework version 2.0
- Microsoft Data Access Components (MDAC) 2.8 or higher
- Microsoft DirectX® 9.0

Console-only Installation

Operating system

- Windows 2000 (SP4)
- Windows 2003 (SP1)
- Windows XP (SP1)

Minimum system requirements

- 512 MB of RAM
- 250 MB available disk space
- .NET Framework version 2.0
- Microsoft DirectX 9.0
