

Symantec Brightmail AntiSpam™

Advanced antispam and email security solution for the enterprise

How it works

Overview

Symantec Brightmail AntiSpam combines effective spam catching with a high accuracy rate that prevents false positives. Deployed at the email gateway, this easy-to-manage solution defends against spam, email fraud, viruses, and other unwanted email. With flexible spam management capabilities and automated filter updates, it meets enterprise security needs without imposing a significant administrative burden.

Key benefits

- Award-winning solution leverages multiple technologies, global distributed operations centers, patented spam detection network, and real-time filter delivery mechanism
- Offers industry's highest accuracy rate¹ and ensures users don't miss important email
- Daily monitoring of accuracy and automatic review of all potential false positives
- Constantly and automatically updates with latest protection, requiring no tuning or training of filters by administrators

1. "Anti-Spam Services for SMBs and Middle-Market End-Users," February 25, 2003 Research note by J.P. Gownder of the Yankee Group

Features and technical specifications

- 95% spam-catching rate²
- 99.9999% accuracy rate
- Protects over 300 million users
- Filters over 15% of worldwide email and over 100 billion emails per month³
- Protects 9 of the top 12 U.S. ISPs⁴
- Automatic, timely, secure updates every 5 to 10 minutes
- Global operations centers in the United States, Ireland, Australia, and Taiwan

Multilayered spam protection

- Over 17 different filtering technologies, including proprietary signatures and heuristics
- Adjustable spam threshold to customize effectiveness and accuracy levels
- Language-based filters to block non-English language spam
- Antifraud filters to protect against phishing and email fraud

Powerful and flexible administration

- Web-based control center provides centralized management of multiple servers, role-based administration, and system alerts
- Customized mail policies support flexible actions, such as message markup or quarantine, for different groups of users
- Multiple quarantines—Web-based quarantine for users or administrators, Exchange quarantine for Microsoft® Outlook® users, Domino™ quarantine for Lotus Notes® users
- LDAP support

Other features

- **Reporting**—Filtering statistics consolidated across all servers, providing visibility on spam filtering performance and trends
- **Comprehensive threat protection**—Optional antivirus protection scans and cleans messages infected with viruses and mass-mailing worms
- **Per-user spam control**—Plug-ins and tools augment email clients such as Microsoft Outlook and Lotus Notes with spam-fighting features
- **Content filtering**—Custom filters and block/allow lists enable administrators to tailor filtering to the needs of the organization
