

Symantec Licensing Program: Rewards

The easy way to earn greater incentives with increasing investment

Symantec Rewards is a licensing program that offers mid-size and large companies easy access to all Symantec software solutions, and support and maintenance service options— with volume-purchase incentives, a predictable pricing methodology regardless of volume, and the ease and flexibility of centralized purchasing. A certain number of points are assigned to each Symantec SKU; with the purchase of more products, points are accumulated (on an annual basis) creating the opportunity to move the organization into more advantageous price bands.

Rewards customers are organizations that:

- Are multinational companies with branches or subsidiaries— that welcome global purchasing power
- Would like an online application that streamlines entry into the program and automatic contract renewal
- Appreciate that the purchase of support service options counts towards the accumulation of points

Key features and benefits:

- Access to all Symantec security and availability software products and Enterprise Support Services
- Online convenience – automated enrollment application to review and accept program terms and conditions
