

Symantec™ Mail Security for Domino®

Protects against viruses, spam, company policy violations, and other security risks.

Overview

Symantec™ Mail Security for Domino® provides high-performance, integrated mail protection against virus threats, spam, and other unwanted content for Domino™ servers. With award-winning virus protection, multi-layered spam prevention features, and flexible policy enforcement, Symantec Mail Security for Domino provides comprehensive mail security with minimal administrative overhead.

Key benefits

- Secure Scanning Optimization allows administrators to avoid repetitive scanning of documents that have previously been scanned using current virus definitions
- Rapid Release Definition support enables administrators to deploy Rapid Release definitions to the Domino environment with no additional scripting. One click returns an environment to standard LiveUpdate distribution methods if desired
- Symantec Enterprise Vault™ tags can now be applied to specify e-mail archiving policy. Policies can be defined for any content type and set retention policy and search criteria for Symantec Enterprise Vault, Discovery Accelerator, and Compliance Accelerator
- Graphical Reporting enables administrators to efficiently identify threats and monitor the overall status of Symantec Mail Security operations
- Multimedia/Executable Analysis pro actively disposes of content when defined by corporate policy
- Attachment Content Scanning provides the ability to identify and/or filter inappropriate content within attachments
- Provides flexible, user and group-based content filtering to automatically identify, classify, or remove messages that violate corporate policy
- Mass-Mailer Cleanup feature automatically eliminates entire messages infected with mass-mailer worms—not just attachments
- Multi-layered spam prevention combines various spam detection technologies, including a heuristics antispam engine, custom filtering rules, and whitelisting techniques to maximize detections and minimize false positives
- Premium Antispam is offered as an additional content subscription
- Minimizes configuration and management time with Zero Maintenance Mode settings
- Outbreak Notification alerts administrators to the first sign of a virus outbreak, allowing them to respond quickly
- Support for the latest versions of Domino including 7.x, 8.x
- Supports Windows 2003/2008
- Backed by Symantec Security Response, the world's leading antivirus and Internet security research and support organization

New features in this release

- Enhanced definition capability for transparent functionality in multi-platform environments
- Support for Windows 2008 32 and 64 bit
- Support for Lotus Domino 8.5.x

System requirements

- Operating System
 - Windows Server 2003/Windows Server 2003 R2/Windows Server 2003 Enterprise Edition , Windows Server 2008 Enterprise(x86 and x64)
 - Lotus Domino Domino 7.0.x, and 8.x
 - Lotus Notes Client 7.0.x, and 8.x
- Processor: 1 GHz Pentium or higher
- Memory: 512 MB
- Available disk space: 4 GB
- Available disk space for processing: 300 MB minimum
- Hardware: CD-ROM drive

Note: Domino server should be sized based on Domino system requirements. System requirements should take into account additional needs such as file system antivirus protection, backup operations, and other business-critical applications unique to the environment.
