

Symantec™ Security Information Manager

Automating the incident management lifecycle for IT security and compliance mandates

Overview

The Symantec Security Information Manager customizable dashboard provides at-a-glance view of security and risk in your environment

Driving a documented, repeatable process for responding to security breaches, threats and failures in IT Policy Compliance controls is the foundation of a strong governance model. The Symantec Security Information Manager provides the foundation for enabling a comprehensive incident response program by helping customer identify, prioritize, respond to and review incidents and threats in their environment.

By providing real-time updates from the Symantec Global Intelligence Network, security response teams can raise their security level and save time by more efficiently managing threats and responding with built-in remediation instructions.

Symantec Security Information Manager minimizes deployment and management costs through a self

maintaining infrastructure, which does not require additional staff and expertise to maintain.

Key features

Identify the critical incidents and threats in your environment

- Correlate millions of events into a manageable set of incidents
- Get comprehensive monitoring through pre-configured collectors to over 100 third-party products
- Incorporate awareness of the global threat landscape with real-time updates from the Symantec Global Intelligence Network

Prioritize security incidents through rich asset-awareness

- A rich and extensible asset view offers prioritized response to the most critical incidents
- The asset table provides classification by policy and regulatory scope, detailed configurations including running services and patch levels

Respond to security incident with a documented, repeatable process

- Lightweight ticketing workflow helps ensure incidents get assigned to appropriate individual and groups, escalation of critical incidents and response SLA reporting

Key features (Respond to security incident with a documented, repeatable process) - continued

- Security incidents include detailed remediation and risk mitigation strategies identified with Symantec's rich database of vulnerabilities, exploits and malicious code

Review history of security incidents for reporting and forensic purposes

- Scalable and affordable archive to retain log data indefinitely
- Hundreds of preconfigured compliance and risk management reports can be customized and scheduled for distribution

Prove compliance and monitor the effectiveness of IT Security Controls

- Enables the real-time monitoring of the IT Security Controls in your environment, including firewalls, VPNs, application, directories, and databases
- Manage security and compliance incidents through a unified workflow

Product specifications

Symantec™ Security Information Manager 9650

Appliance

- Rack Mount, 2U form factor
- (2) Dual Core Xeon 2.66 GHz Processor with 4 MB Cache
- 1333 MHz Front Side Bus
- 8 GB 533 MHz (4x2 GB), dual ranked DIMMs
- (2) 146 GB, SAS, 15 K RPM Hard Drives, Raid 1 Configuration
- (4) 300 GB, SAS, 10 K RPM Hard Drives, Raid 5 Configuration
- 8X DVD-ROM
- (3) PCIe Slots
- Redundant Power Supplies with Dual Cords
- 5th Generation Remote Access Card

Symantec™ Security Information Manager 9630

Appliance

- Rack Mount, 1U form factor
- (2) Dual Core Xeon 2 GHz Processor with 4 MB Cache
- 1333 MHz Front Side Bus
- 8 GB 533 MHz (4x2 GB), Dual Ranked DIMMs
- (2) 146 GB, SAS, 15 K RPM Hard Drives, Raid 1 Configuration
- 8X DVD-ROM
- (2) PCIe slots
- Redundant Power Supply with Dual Cords
- 5th Generation Remote Access Card

System requirements

Symantec™ Security Information Manager Console

- Microsoft Windows XP
- Microsoft Windows 2003 Server
- Microsoft Windows 2000 Server
- Microsoft Windows 2000 Advanced Server
- Microsoft Windows 2000 Professional

Services information

Symantec™ Solutions Enablement Services

Symantec Solutions Enablement Services offers security solution implementation, operational integration, and on-site management services to optimize and accelerate the benefits of Symantec Security Information Manager. Symantec security consultants assess organizations' security technology needs, design optimal systems and architectures, and implement the right solution. Symantec experts help organizations purchasing Symantec Security Information Manager choose the implementation, integration, or custom services that best meets their business needs.
