

# Symantec™ Control Compliance Suite for Microsoft Exchange

Simplify and automate the management of Microsoft® Exchange Server to help ensure security, compliance and availability.

---

## Overview

Symantec Control Compliance Suite for Microsoft Exchange allows organizations to automate the assessment and remediation of configurations in their Exchange environment.

Email is still the core business communication tool, and the security of corporate intellectual property is directly linked to the security of information contained in emails. Today, managing risk in an organization is made more difficult by the variety of security issues and the need to comply with multiple external regulations. Recent research indicates that companies investing in one-off solutions for each regulatory challenge they face will spend substantially more on IT compliance than those that develop a single solution to manage multiple regulatory requirements. Organizations are seeking tools to simplify and centrally manage their business-critical Exchange systems with maximum efficacy.

Symantec Control Compliance Suite for Microsoft Exchange applies advanced, cost-effective technology and delivers automation to report on configurations, permissions and vulnerabilities. It provides precise reports about where your organization does-or does not-comply with internal technical standards, as well as ad hoc querying capability. Symantec Control Compliance Suite also outlines specific steps for

addressing non-compliant systems, and the ability to perform in-console remediation.

---

## Key features and benefits

### *Strengthens the security of corporate intellectual property*

- Automatically scans, copies, moves or deletes emails
- Protects documents that may be needed for legal evidence
- Automates search to reduce the time needed to obtain data

### *Manages email compliance*

- Performs advance audits and assessments
- Uses pre-defined or fully customizable queries to enforce security configurations and disk space rules
- Remediates problems with the ability to take immediate action directly from fields in a report
- Automates the process of verifying compliance with corporate policies
- Provides reporting on journaling
- Provides reporting on mobile devices

## Data Sheet: Compliance and Security Management Symantec™ Control Compliance Suite for Microsoft Exchange

### *Tracks compliance to IT controls related to important regulations and frameworks*

- Supplies regulatory content for Sarbanes-Oxley, FISMA, HIPAA, GLBA, Basel II, and Framework content for ISO 17799, COBIT, and NIST SP800-53
- Validates the configuration of Exchange systems against corporate information security standards and regulations
- Provides a tool to help you satisfy the legal and audit information requirements imposed by regulations
- Displays pass/fail scores against industry regulations and governance frameworks based on technical check assessments

### *Reduces security exposures*

- Finds and eliminates viruses automatically
- Provides visibility into administrative and user rights on mailboxes and distribution lists
- Finds orphaned accounts

### *Satisfies service level agreements*

- Determines traffic patterns to evaluate capacity and plan the location of new mail servers
- Reports on the email mailbox size and traffic to determine which departments, divisions, etc. are consuming what percentage of resources
- Assesses server configurations to report on which hotfixes and service packs are loaded on which servers
- Load balancing capability with drag and drop interface to move mailboxes across sites, servers and containers
- Can be configured to provide performance alerts
