

# Symantec Mail Security™ for Microsoft® Exchange

An integrated security solution that protects against viruses, spam, and other unwanted content

---

## Overview

Symantec Mail Security™ for Microsoft® Exchange provides high performance, integrated mail protection for Microsoft® Exchange 2000/2003 servers. An optional Symantec Premium AntiSpam add-on subscription service, powered by Brightmail technology and response, provides best-of-breed spam prevention without requiring additional administration or software installation.

---

## Key Benefits

- NEW! Optional Symantec Premium AntiSpam add-on subscription service provides best-of-breed spam prevention with low administrative overhead and no additional software to install
- NEW! Multiple daily virus updates using Symantec Rapid Release enable organizations to respond quickly to new threats
- Protects Microsoft Exchange messaging environments against new and known viruses using Symantec's extensible NAVEX™ antivirus technology
- Mass-Mailer Cleanup automatically eliminates entire messages infected with mass-mailer worms, not just attachments
- Basic spam tools include heuristic engine, sender and recipient whitelist, custom filtering, and integration with Microsoft's Spam Confidence Level and Intelligent Message Filter technologies

- Incorporates rules-based content filtering to prevent unwanted content from entering—and confidential information from leaving—the network
  - Backed by Symantec Security Response, the world's leading antivirus and Internet security research organization
- 

## Features and Technical Specifications

- Award-winning Symantec antivirus technologies enable administrators to update dynamically, without stopping scan services or incurring server downtime. And with integrated LiveUpdate™ functionality, virus cures can be deployed rapidly, providing optimal protection against quickly spreading threats
- Attachment and subject line blocking capabilities enhance protection by providing hour-zero responses against emerging threats
- Symantec Mail Security for Microsoft® Exchange provides full support for Exchange 2003, including the new VS API 2.5 and SCL functionality
- Centrally managed through a multi-server console, enabling simultaneous updates to all Microsoft® Exchange server settings across the enterprise
