

Symantec pcAnywhere™ Access Server

Facilitates the discovery of, and connection to, multiple pcAnywhere™ hosts from anywhere

Overview

Symantec pcAnywhere™ Access Server, when used in conjunction with Symantec pcAnywhere™, facilitates the discovery of and connection to multiple pcAnywhere™ hosts from anywhere—regardless of location or network configuration.

Features and benefits

- Allows hosts to be discovered and “docked” to the Access Server from wherever they are, minimizing or eliminating potential challenges introduced by DHCP firewalls or NAT devices
- Detects when host machines are online and available for connection, regardless of location or network configuration
- Enables Web access to host devices regardless of host location
- Eases remote access management by enabling logical arrangement of available hosts by customer, organization, or department

System Requirements

Symantec pcAnywhere™ Access Server

This product is for use with Symantec pcAnywhere (sold separately). This product does not contain Symantec pcAnywhere software.

Supported pcAnywhere Versions

- Remote—Symantec pcAnywhere™ 12.0 or later
