

Instructions for the Version Upgrade Process in the Symantec Licensing Portal

The complete version upgrade process has 3 tasks:

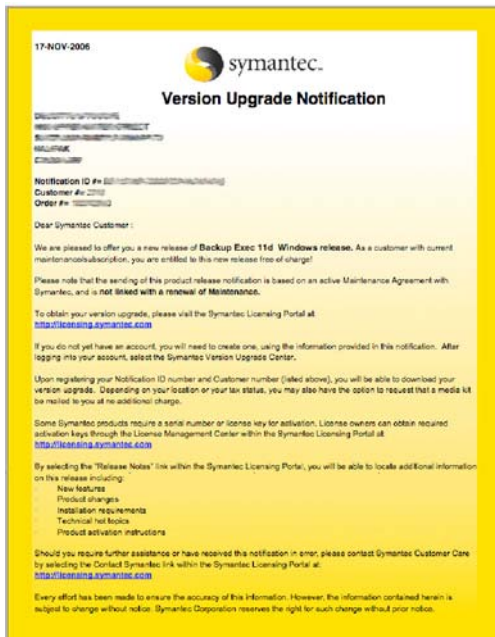

- **Task A: Respond to Your Version Upgrade Notification**
- **Task B: Register Licenses and Obtain Your License Keys**
- **Task C: Download or Request your Physical Product Software.**

Each task has a series of steps. This document will guide you through each step in each task.

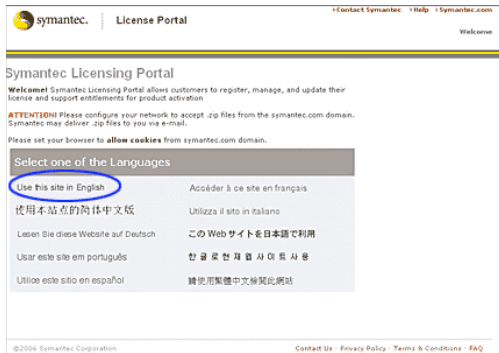

Please note: Symantec is working continually to improve the version upgrade process. This guide will be revised as changes are made to the portal site. Before beginning the upgrade process, please check the website at <http://www.symantec.com/enterprise/licensing/activation/index.jsp> to be sure you have the most recent version of this document.

Symantec Customer Care (US and Canada): 1.800.721.3934

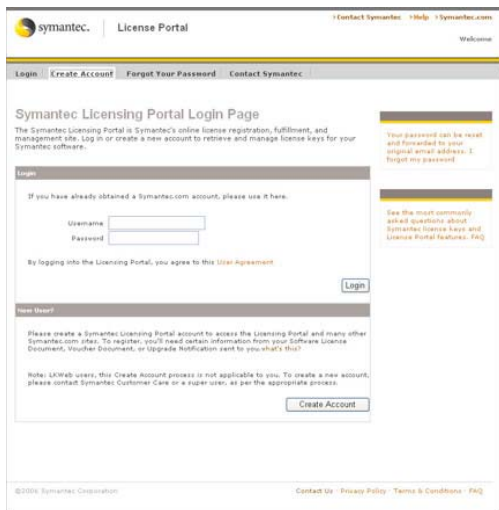

Task A: Respond to Your Version Upgrade Notification

1. Have your Upgrade Notification document ready. This is sent to you via email.

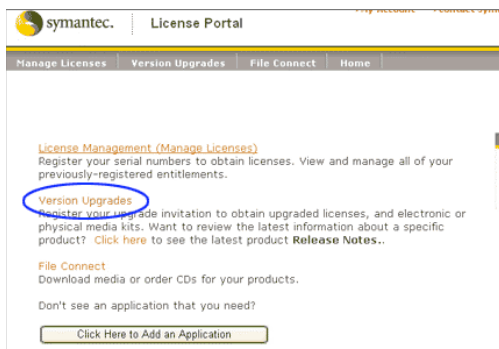

2. Go to the Symantec Licensing Portal [<https://licensing.symantec.com>] and select a language.

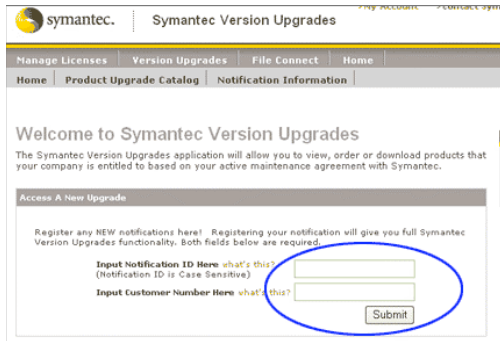

3. Login to the Symantec Licensing Portal.
** If you are new to the Portal and have not created an account at Symantec, you will need to first create an account. If you have difficulty creating an account, please refer to <https://licensing.symantec.com/acctmgmt/help/LicensingPortalFAQ.jsp> for a walkthrough of the process.**

Note: Customers who have created accounts with Symantec or Veritas to download trialware, white papers, or to view webcasts may already have Licensing Portal accounts. If you find that your email address already exists in our system, please recover or reset your password and use your existing account.

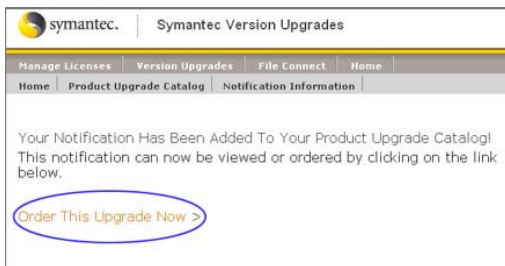

4. Click on the "Version Upgrades" link.

The screenshot shows the Symantec Version Upgrades home page. The navigation bar includes "Manage Licenses", "Version Upgrades", "File Connect", and "Home". Below the navigation bar, there are tabs for "Home", "Product Upgrade Catalog", and "Notification Information". The main content area is titled "Welcome to Symantec Version Upgrades" and contains a section "Access A New Upgrade" with a form. The form has two input fields: "Input Notification ID Here" and "Input Customer Number Here", both with "Submit" buttons. A blue oval highlights the "Submit" button for the "Input Customer Number Here" field.

5. On the Version Upgrades Home Page, enter the required data from your Upgrade Notification document and click the "Submit" button.

The screenshot shows the Symantec Version Upgrades confirmation page. The navigation bar is the same as in the previous screenshot. The main content area is titled "Your Notification Has Been Added To Your Product Upgrade Catalog" and contains a link "Order This Upgrade Now >". A blue oval highlights the "Order This Upgrade Now >" link.

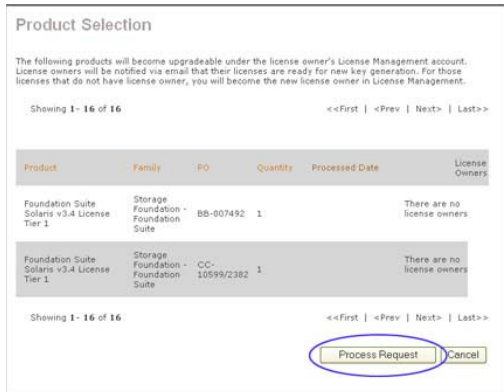

6. On the next page, click the "Order This Upgrade Now" link

The screenshot shows the Symantec My Upgrades page. The navigation bar is the same as in the previous screenshots. The main content area is titled "My Upgrades" and contains a section "Notification Info" with a table of details. Below the table is a "Change / Create New Address" button. Further down is a section "Upgrade Licenses" with a "Upgrade Licenses" button. A blue oval highlights the "Upgrade Licenses" button.

Notification Info	
Company Name :	
Notification Id :	
Notification Date :	24-Feb-2003
Notification Status :	OPEN (what's this?)
Update Description :	Not Available

7. On the My Upgrades page, click the "Upgrade Licenses" link

8. On the Product Selection page, click the "Process Request" button.

**Note the "License Owner" column in the list. If a license owner is identified, that user will be enabled to get the new version license key within the licensing portal once this first task is completed. If there is no license owner identified, as in the example screen below, then the user who is completing the process will become the license owner. The license owner only controls the license within the licensing portal. This does not imply ownership. (To request a change of license ownership, please contact Customer Care. In the USA and Canada, please dial 1.800.721.3934; for other regions, please refer to this web page for contact information:
http://www.symantec.com/enterprise/support/assistance_care.jsp)

9. You will see a Thank You page.

NOTE: YOU ARE NOT READY TO GET NEW LICENSE KEYS YET!

This completes the first of three major tasks in the upgrade process. See the instructions in "Task B: Register Licenses and Obtain Your License Keys" below for the next steps the process.

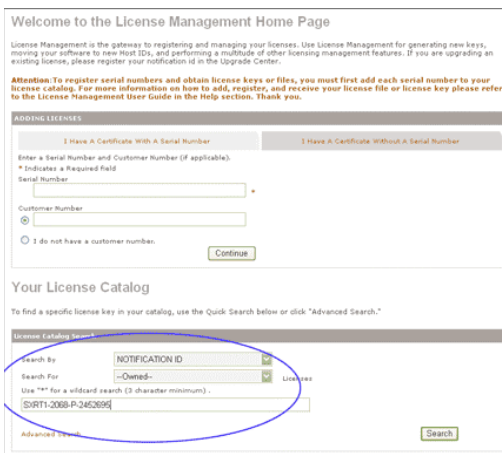

YOU MUST WAIT AT LEAST 30 MINUTES AFER COMPLETING THIS TASK BEFORE BEGINNING EITHER OF THE NEXT TASKS

Task B: Register Licenses and Obtain Your License Keys

NOTE: You will only be able to accomplish the following steps if you are identified as the license owner of the original license that is eligible for upgrade, or if you are the user who completed the steps in Task 1 above for a license with no existing license owner. (For assistance in the US and Canada, call Customer Care at 1.800.721.3934. For other regions, please refer to this web page for contact information: http://www.symantec.com/enterprise/support/assistance_care.jsp)

1. Login again to the Symantec Licensing Portal, and on the Home page click the “License Management” link.

2. On the License Management Home Page, scroll down to the “Your License Catalog” section.

Enter the following criteria:

Search By: **Notification ID**

Search For: **Owned**

Enter your Notification ID (from your Version Upgrade Invitation document) in the input field.

Click the "Search" button.

NOTE: If searching by Notification ID does not produce any results, try searching for the Order Number printed on your Upgrade Invitation.

3. In the Search Results list, locate the license you wish to get a key for and click the "View Details" link.

If there was no license owner for the original license, then locate the record for the new version (e.g., if no one registered version 4 in the licensing portal, and you accepted the upgrade for version 5, then you should locate the version 5 license in your catalog).

If you are the license owner of the original license, this is the record you should locate in your License Catalog (e.g., if you're upgrading to a version 5, look for the version 4 license in your catalog).

Entitlement Details

Below are the details and history for the license you selected.

Order Details

Customer Name: [redacted]
 Customer Number: [redacted]
 Order Number: [redacted]
 Entitled Price Tier: 1
 Quantity Purchased: 1

License Key Details

Product (SKU): Foundation Suite Solaris v3-4 License Tier 1 (A01705F-100000)
 Product Version: NA
 RTSM ID: [redacted] [what's this?](#)
 Serial Number: [redacted]
 Host ID: [redacted]
 Deployed Price Tier: N/A
 System Type: N/A
 Date Added: N/A
 Date Registered: 07-10-2000
 Start Date: N/A
 End Date: N/A
 SAN: N/A
 License Keys: [redacted]

License Key Options

Move License To a New Host
 Move License To a New Address
 Edit User-Defined Fields For This License
[Add Comments](#)
[Upgrade This License](#)
 File Connect
 Share Licenses

4. On the Entitlement Details page, if this is for the original license, then click the "Upgrade This License" link.

If the Entitlement Details page is for the *new product version*, click the link that reads "Register This License."

License Management Home | License Catalog

Upgrade This License

Click the "Upgrade" button below to replace the old licenses with the new upgraded licenses. Clicking the "Cancel" button will not upgrade the old license key.

Version of software you are upgrading to

5. On the Upgrade License page, verify the version you want to upgrade to and click the "Upgrade" button.

If you wish to upgrade from more than one version back (e.g., from Backup Exec version 9.1 to 11d), you need to complete the registration task for each version up to and including the latest version (e.g., from Backup Exec version 9.1 to 10.0, then from version 10.0 to 10d, then from version 10d to 11d). When you complete the first upgrade (e.g., 9.1 to 10d), you must then locate that new license in your License Catalog and click the "Upgrade This License" link again. This will begin the second upgrade (e.g., from 10.0 to 10d), and from here on you follow the same steps until you get a license key for the version you wish to deploy.

After you click the "Upgrade" button you will be taken through a multi-page license registration process. The exact registration process is based on the license you are upgrading and the data required to generate the new version license key. For example, if you are upgrading a node-locked license, you will need to provide Host Machine information (e.g., Host ID, etc.).

License Management Home | License Catalog

Upgrade License Confirmation

Your licenses have been upgraded and are now stored in your license catalog. Your old license keys have been replaced with the new upgraded keys.

7. On the Entitlement Details page, your License Key should be displayed at the bottom of the License Key Details section.

This completes the second of the three tasks. Complete the process by going through steps for Task C below.

Task C: Download or Request Physical Product Software for a Version Upgrade

symantec. License Portal

Manage Licenses | **Version Upgrades** | File Connect | Home

[License Management \(Manage Licenses\)](#)
 Register your serial numbers to obtain licenses. View and manage all of your previously-registered entitlements.

Version Upgrades
 Register your upgrade invitation to obtain upgraded licenses, and electronic or physical media kits. Want to review the latest information about a specific product? [Click here](#) to see the latest product **Release Notes**.

File Connect
 Download media or order CDs for your products.

Don't see an application that you need?
[Click Here to Add an Application](#)

1. Login again to the Symantec Licensing Portal and click the "Version Upgrades" link.

symantec. Symantec Version Upgrades

Manage Licenses | **Version Upgrades** | File Connect | Home

Home | **Product Upgrade Catalog** | Notification Information

Welcome to Symantec Version Upgrades

The Symantec Version Upgrades application will allow you to view, order or download products that your company is entitled to based on your active maintenance agreement with Symantec.

Access A New Upgrade

Register any NEW notifications here! Registering your notification will give you full Symantec Version Upgrades functionality. Both fields below are required.

Input Notification ID Here [what's this?](#)
 (Notification ID is Case Sensitive)

Input Customer Number Here [what's this?](#)

2. On the Version Upgrades Home Page, click the "Product Upgrade Catalog" link.

Product Upgrade Catalog
Search to find your upgrades or see the catalog of Open notifications to view details or order your Upgrade.

Quick Catalog Search: Search by Status OR Notification ID(s):

Show: Notifications: (Search for multiple notifications by using the "Advanced Search" link below)

Media Selection

Click below to link to Symantec's FileConnect application. Within FileConnect, you can obtain the products included in this Notification either physically or electronically (subject to availability).

Please note: Ordering media does not upgrade licenses.

[File Connect](#)

3. Enter your Notification ID in the search box, or find your product in the list of upgrades shown. When you locate the product, click the "View/Order" link.

4. On the My Upgrades page, scroll down and click the "FileConnect" link in the Media Selection area. This will launch a new browser window containing the FileConnect application.

NOTE: FileConnect is Symantec's Enterprise Software download site. Customers upgrading to a new version of their software who wish to request physical media at no charge must access FileConnect via this link. Accessing FileConnect any other way will not allow you to use the "Ship Me a CD" function.
