

VERITAS APM Customer Testimonials

"Before we started using VERITAS Indepth for SQL Server, we were only able to get 67 concurrent users on our employee benefits program. We were originally just hoping to get 250 people on concurrently. Then we load tested and looked at the results through VERITAS Indepth for SQL Server which enable us to quickly pinpoint areas to make code changes to get 500 concurrent users logged on."

Chad Miller, Database Administrator, Raymond James Financial

"We devoted 6 months and a multitude of patches in order to resolve the performance bottleneck on the BT Openworld eHub. Using the remarkable VERITAS i3, we identified and resolved the problem in one morning."

Neal Kelshaw, Capacity and Performance Manager, BT Retail Internet Operations

"VERITAS i3 for SAP provides the vital information we need to deliver the high level of service our SAP business community demands."

Hector Armendaiz, SAP Basis Manager, Hylsamex

"VERITAS Indepth will help us keep picking off bottlenecks as they occur, and NetBackup will help ensure our reliability and availability. I'm confident that the sky's the limit with this software."

Michael Clifford, Director of IT, Gevity HR

"For us VERITAS is more than a monitoring tool, it's a solution for total performance management."

Marcelo Soria, Chief Technology Officer, Veraz (Equifax Brazil)

"The VERITAS i3 solutions paid for themselves within a week, and, on the whole, have saved us the expense of hiring an extra DBA."

Robert Sacca, Manager of Database Services, The Research Foundation of the State University of New York

"I made a checklist and, after testing, the choice was clear: the results were substantially in favor of VERITAS application performance management products over Mercury Interactive and BMC. VERITAS provides the perfect set of products for our needs."

Alejandro Cavazos, System Programming Manager, gedas Mexico
